

# Manual Traps

**ALWAYS WEAR STOUT GLOVES AND EYE PROTECTION WHEN OPERATING MANUAL TRAPS**

**ONLY THE PERSON OPERATING THE TRAP TO BE IN THE ENCLOSURE WHEN IN USE**

*Manual traps are dangerous if they are not operated in the correct way.*

*Always keep the box of clays to the left hand side of the trap.*

# Instructions

1. Using your **LEFT HAND**, cock the trap by pulling the arm around clockwise until it stops.
2. With your **LEFT HAND**, load a single clay on to the trap, locating it on the tie-wrap. If you are throwing two clays, load them one at a time, bottom slot first.
3. To throw the clay, ***keep your right hand well clear***, and with your **LEFT HAND FLAT AND TO THE LEFT OF THE ARM**, push the arm over center until it fires.

4. When you have finished, be sure to leave the trap unloaded and un-cocked.
